Crafts Software

Battery Store ERP

Billing, stock, warranty and books for a battery shop. One install on ordinary shared hosting, and the counter staff are selling the same day.

Touch-and-scanner POS

Split payments, hold bills, works offline

Serial-tracked warranty

Find any sale from the number on the battery

Real accounting inside

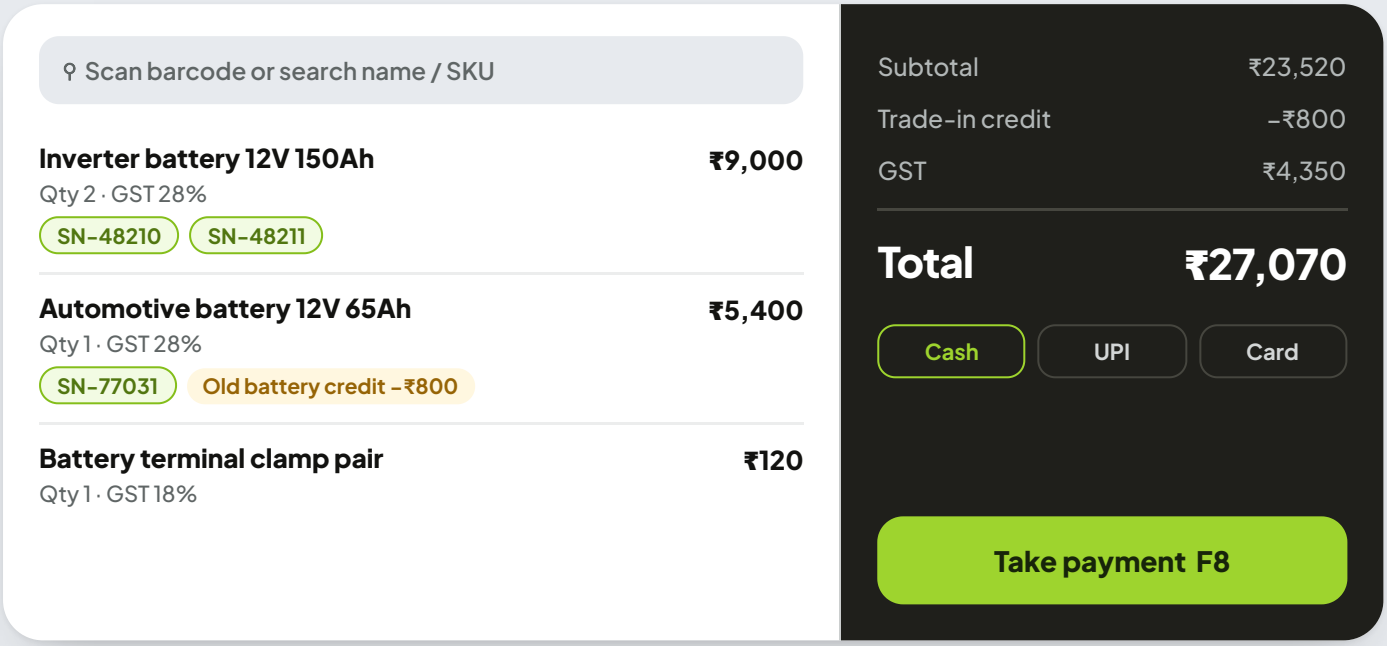

GST, ledgers, P&L and balance sheet

PHP 8 + MySQL no Composer, no build step

One store · direct sales

Sell at the counter, fast

A full-screen POS built for a busy shop. Scan the barcode or search by name, add the serial, take the money, print the bill.

Illustrative screen. Sample prices and serial numbers.

Scanner and touch friendly

Any barcode or a name search adds the line. Big targets for a touch screen, keyboard shortcuts for speed.

Split and credit payments

Cash, UPI, card, bank or on account, in any mix. Customers with a balance are tracked automatically.

Old battery exchange

Enter what came back and the trade-in value. It comes off that line like a discount and is reported separately.

Serial number per battery

Scan or type the number on each unit. The same serial can't be sold twice while its first bill is active.

Shifts, hold and resume

Cashiers open a shift with the drawer cash. Park a bill, serve the next customer, come back to it.

Offline billing

If the server can't be reached, the counter keeps billing. Bills are saved and flagged for review.

Offers and discount limits

Automatic offers, buy-more-pay-less tiers, and a manager approval when a discount goes past the cashier's limit.

80 mm receipt, invoice, WhatsApp

Thermal receipt or A4 tax invoice, with serial numbers printed under the battery. Send the bill on WhatsApp.

Every battery, every warranty

A battery is one SKU, one barcode, one stock count, plus its spec and warranty length. No variant maze.

Warranty check

A customer walks in with a claim. Type the serial.

SN-48210 | Check

In warranty until 14 Oct 2028

Inverter battery 12V 150Ah · Bill INV-0412 · 14 Oct 2026

Type	Voltage	Capacity	Warranty
Inverter	12 V	150 Ah	24 months

Illustrative screen. Sample data.

Warranties expiring soon

On the dashboard, only for bills still active.

This week	3
This month	7
30 to 60 days	11
60 to 90 days	5

Next to expire

Inverter battery 12V 150Ah · Walk-in · 11 Oct

Automotive battery 12V 65Ah · R. Kumar · 13 Oct

Illustrative figures.

Battery catalog

Name, SKU, barcode, category, brand, prices, tax and stock, plus type, voltage, capacity (Ah) and warranty months.

Automatic per-sale warranty

Each battery line gets its own end date the moment the bill saves. Cancel the bill and its warranty drops off.

Serials free up on return

Cancel a bill or return the whole line and its serials can be sold again. The history stays on file.

Reorder suggestions

Based on how fast each battery sells and its minimum stock, so you buy what you need.

Stock take and adjustment

Count the shelves, post the difference, and every change is on the audit trail.

Barcode labels, bulk prices

Print stickers for shelves and units. Change prices for a brand or category in one go.

Built for one store. Direct sales from one counter. No warehouses, no branches, no stock transfers to set up or explain.

Books that keep themselves

Every sale, purchase and payment posts to a double-entry ledger in the background. Real reports, no bookkeeping at the till.

Accounts and GST

- Weighted-average stock cost and gross profit per bill
- CGST, SGST and IGST on every line
- Customer and supplier ledgers, outstanding lists
- Cash and bank, expenses, income, cheque register
- Trial balance, profit and loss, balance sheet
- GST reports, e-invoice file, Tally export
- Bank and UPI statement matching

Buying and selling

- Purchases, purchase orders and supplier returns
- Quotations and delivery challans, billed later
- Sales returns, plus exchange: return and rebill in one step
- Salesperson commission, with payouts
- Dashboard: net sales, profit, stock value, receivables, payables
- Top-earning brand and exchange credit given
- Daily summary and low-stock alerts

Control and safety

Admin · Manager · Accountant · Cashier · Salesperson · Viewer

- Permissions per module and action
- Discount limit per role, manager approval above it
- Full audit log of who changed what
- One-click database backup and restore
- Day lock after the books are closed
- Light and dark mode, 80 mm and A4 print

Live in an afternoon

1. **Upload**
   Extract the zip into public_html on any shared host.
2. **Create a database**
   One empty MySQL database and a user, from cPanel.
3. **Run the installer**
   Open /install/ and fill in the shop and admin details.
4. **Start selling**
   Add your batteries, or load the sample shop first.
